Electives Outside the School of Social Work

The SSW encourages interdisciplinary education as demonstrated in our dual degree programs and certificates. You may also take electives outside of the school in lieu of the electives being offered within our program. The electives must be at the 6000, 7000, and 8000-level course offering. Suggested disciplines include Education, Family and Consumer Sciences, Sociology, Psychology, or Public Health. Seek the advice of your academic advisor when selecting electives. Sometimes electives taken outside the SSW also require the permission of those departments in order for a SSW student to enroll. **The outside elective form in Appendix D must be approved by the MSW Academic Advisor for the student's assigned campus and the MSW Program Director before a SSW student can enroll in the outside elective.**

Full-Time and Extended-Time Options Students are permitted to take one Social Work elective off their assigned campus (Athens or Gwinnett), if approved based on the student's area of interest, certificate program requirements, dual degree program requirements, and externally funded training programs. In addition, MSW students are only permitted to take one non-SSW elective, i.e., elective outside of the School of Social Work; unless required by certificate or dual degree programs.
